

Fort Pembina ND

Sept 12 91

Dear Means

Many thanks for the  
<sup>(Willet).</sup> information about the ~~Snipe~~ we  
stuck here, or him, sure.  
About hunting east of here  
according to all reports it  
must be grand, any thing  
from a bird to a moose.

The Roseau River country  
about 40 miles from here is  
what I refer to. I could  
send you out from here  
for a short time but you could  
establish your camp and send  
transportation back  
Yours truly

American Museum of Natural History,  
Central Park, (77th St. & 8th Ave.)

Department of  
Mammalogy and Ornithology,  
J. A. Allen, Curator.  
Frank M. Chapman, Ass't Curator.

New York City, Feb. 19 1891

Thank you dear Wild  
man for this fresh  
proof of your affection.  
Surely we are many  
times your debtors, but  
that we appreciate  
your kindness and  
promptness we do  
assure you.

I return the labels  
for which there seem to  
be no specimens and  
remain as follows:

5321 is Urois S. coccinei ✓  
nat plumbeus.  
5041 = Hermannophila celata ✓
